

PHOTO CROPPING GUIDE

Prints come in many sizes, although all images are created by the camera at a 2:3 ratio. Depending on the size of the print you are choosing, part of the image may be cropped. The visuals below show what a photo would look like at different sizes. Depending on the photo, there is generally some flexibility on where the crop is made. If there is a photo you want cropped at a certain size and it's not looking the way you imagine, please contact me to discuss your wishes.
